Hand drier in timeless and unique design

The new hand drier from **d line** benefits from a design that will not only fit into a variety of environments, but will also add a classic and clean expression to bathrooms and washrooms

Activated automatically, via sensors, the hand drier ensures hygienic and low energy functionality. A discreet, luminous pictogram on the front of the hand drier indicates usage. The acrylic pictogram is elegantly complemented by the matt AISI 316 stainless steel of the hand drier.

Successfully balancing two very different materials in one product, designer Knud Holscher hereby supplements the **d line** series with a stylistically recognizable, new unit.
